PROFESSIONAL SUMMARY

Senior UI/UX Designer with 13 years in enterprise B2B SaaS, concentrated in healthcare and AI platforms. Strongest where design meets delivery — wireframes and high-fidelity UI in Figma through to production-ready front-end in HTML5, CSS3, SCSS, Bootstrap and Tailwind, backed by scalable design systems and component libraries. Currently design UI for AI decision-support products including Brightcone.ai and InpharmD's Formulary IQ, focused on data-dense dashboards and human-in-the-loop review screens for expert users. Previously UI Lead at Micropyramid Informatics, mentoring 6 designers; contributed to RunCode.io, serving 100,000+ users. Partner closely with product and engineering to ship accessible, responsive products.

CORE COMPETENCIES

UI & Interaction: UI Design | Interaction Design | Information Architecture | Wireframing | Prototyping | User Flows | Responsive Web Design | Dashboard & Data-Dense UI | Accessibility (WCAG).

AI Platform Design: AI Decision-Support UI | Human-in-the-Loop Review Screens | Prompt-Driven Interfaces | Data Visualization.

Design Systems: Design Systems & Tokens | Component Libraries | Design-to-Code Handoff | Design QA.

Front-End: HTML5 | CSS3 | SCSS | Tailwind CSS | Bootstrap | Responsive / Cross-Breakpoint Builds | Basic JavaScript.

Tools: Figma | Penpot | Adobe XD | VS Code.

AI-Assisted Design: Claude, Figma Make, Google AI Studio, Stitch, Banani — rapid concept exploration, design-system generation, front-end scaffolding.

PROFESSIONAL EXPERIENCE

Senior UI/UX Designer (Part-Time Consultant) | Medongo health pvt.ltd. R-Clinic(Reliance Foundation)
Apr 2026 - Jul 2026 · Mumbai, India

- R-Clinic (Reliance Foundation) — Healthcare Consultation Platform: Refined UI/UX across Consultation, Pre- and Post-Consultation modules, improving usability, visual consistency and workflow efficiency.

Senior UI/UX Designer (Part-Time Consultant) | Yanthraa Information Systems
Jan 2025 – Present · Hyderabad, India

- Led end-to-end product design for Brightcone.ai, an enterprise AI workflow platform for healthcare, transportation, and communications — owning UX from research through production handoff.
- Designed data-dense dashboards that turn automated actions, human-in-the-loop review, and AI recommendations into clear, actionable screens, prioritizing information hierarchy so operators can spot exceptions and act without leaving the primary view.
- Partnered with leadership on investor and sales presentations, translating product concepts into clear visual stories.
- Built reusable design patterns and tokens across product, marketing, and sales, cutting design-to-development handoff time by ~25%.
- Leveraged AI design tools (Claude, Figma Make, Google AI Studio) to accelerate concept exploration and front-end scaffolding.

Front-End & UI Consultant | Independent Engagements

Oct 2024 – Dec 2024

- Converted Figma designs into responsive, pixel-accurate HTML/CSS for **InnPro**, a cloud hotel-management system — delivered 3 modules across ~48 mobile app screens.
- Built a Bootstrap-based responsive front end for a customizable e-commerce product across 3 breakpoints.

UI Designer → UI Lead | Micropyramid Informatics Pvt. Ltd.

Apr 2013 – Sep 2024 · Hyderabad, India

- Led UI design and front-end delivery across SaaS platforms in healthcare, HRTech, cloud, and enterprise-workflow domains.
- Built a scalable design system and component library that improved UI consistency and cut design-to-development turnaround, reducing implementation rework.
- Partnered with CTOs, product leaders, and engineers to translate business requirements into extensible, maintainable UI.
- Modernized legacy platforms with current CSS frameworks and responsive best practices, improving usability across devices.
- Mentored a team of 6 designers to ship pixel-accurate builds across desktop and responsive breakpoints.

SELECTED PROJECTS

- **Brightcone.ai — Enterprise AI Workflow Platform:** Simplified complex AI processes into user-centered dashboards and decision-support flows across healthcare, transportation and communications; created product storytelling assets for demos and stakeholder presentations.
- **InpharmD — Formulary IQ & inpharmd.com (Clinical Decision Support & Pharmacy Financial Optimization):** For Formulary IQ, designed the landing page and data-visualization dashboard screens for a health-system decision-support platform. For inpharmd.com, designed selected dashboard modules and mobile/tablet responsive layouts.
- **Veridx.ai / EzMedTech.ai — AI Healthcare Dashboards:** Designed role-based, data-heavy decision-support dashboards for healthcare and legal-tech workflows with strong information hierarchy.
- **RunCode.io — Cloud-Based Developer Platform:** Designed modular dashboard experiences and go-to-market assets for a platform serving 100,000+ users — HackerNoon Startup of the Year 2023.
- **Refactored.ai — AI-Powered Career Solutions Platform:** Designed front-end and dashboard screens in Adobe XD for an AI-powered skills-training and career platform; built responsive HTML/CSS integrations with Bootstrap, delivering pixel-accurate layouts across devices.
- **R-Clinic (Reliance Foundation) — Healthcare Consultation Platform:** Refined UI/UX across Consultation, Pre- and Post-Consultation modules, improving usability, visual consistency and workflow efficiency.
- **Pietrack.com — Workforce & Sales Management Platform:** Owned UI/UX for HRM, project-management and sales dashboards, simplifying enterprise workflows end-to-end.

AWARDS & RECOGNITION

- **Most Innovative Startup Award — RunCode.io:** Contributed to the product experience; recognized by the Telangana IT Minister.
- **HackerNoon Startup of the Year 2023 — RunCode.io:** Helped design user-centered experiences contributing to the award.

EDUCATION

Bachelor of Technology, Computer Science — Gokul Institute of Technology and Sciences, Bobbili, India · 2007–2011
